

TELETANDEM PROJECT - Spring 2013

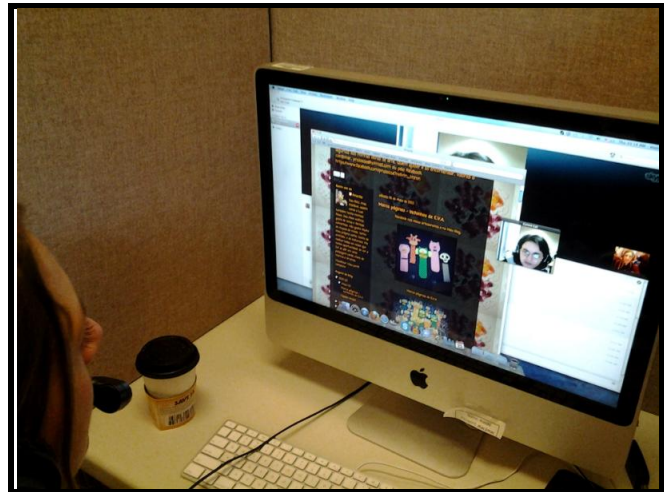

PORT201-A Students

PORT201-A completed seven weekly Teletandem sessions at the Language Learning Center (plus one introductory videoconferencing session in the classroom). Our students were thrilled to be able to speak with other students from UNESP (Universidade Estadual de São Paulo). The four-part sessions included: an initial discussion about the next topic, the Skype interaction, a feedback session, and a composition about their experience. The project had excellent support from Sherri Huber and Larry LeSage from the Language Learning Center.

The Teletandem project is coordinated by Dr. João A. Telles, from UNESP-Assis. His team includes UNESP professors and graduate students who supervise individual Teletandem sessions with other international universities. Dr. Daniela Moraes Garcia was our Spring 2013 supervisor.
